

Product Feature

Quote Creation

Made for freight

Don't fight other tools, use one that's purpose-built.

Capture all the detail

We've got all the fields, accessoriials, modes, etc.

Use templates

Stop replicating the same thing over and over again.

The screenshot displays the Shipment Builder interface for quote creation. It shows a multi-step form for defining a shipment. Step 1: Shipment Details includes fields for Shipment ID, Description, Value, Weight, and Hazmat status. Step 2: Commodity details include Commodity Description, Unit Type (set to Pallet), Unit Ct., and Piece Ct. Step 3: Stop 1 and Stop 2 details show locations, appointment times, start/end dates, and stop types (Pickup). Step 4: Equipment selection shows a Van listed under Type. Step 5: Shipment Summary provides a summary of the shipment details. A sidebar on the right lists 'Shipment Builders' and 'Full Truckload' options. A bottom banner for 'Quote Watchers' indicates up to 45,000 quote watchers.
